EXPERIENCE

ShuffleUp, belarus: *Junior Front End Developer*

DECEMBER 2024 - PRESENT

I'm a front-end developer specializing in Angular, part of the team responsible for building quality web solutions. I work with technologies such as AngularJS, SASS, JavaScript, TypeScript, HTML, and CSS, and use tools like Cypress and Jest for testing. I manage code with Git and GitLab to maintain a collaborative and efficient process..

Pragma, Medellín: *Trainee Front End Developer*

MARCH 2024 - AUGUST 2024

I worked as a front-end developer with a focus on React. I also supported occasional back-end tasks using Node.js. During this time, I strengthened my skills in modern technologies and best development practices.

EDUCATION

Sena, Armenia: *Técnico en análisis y desarrollo de software.*

MARCH 2022 - MARCH 2024

Full-stack development training. Mastery of object-oriented programming, relational databases, web interface development, server-side logic, and API consumption. Application of agile methodologies such as SCRUM in integrative projects with a focus on complete and functional solutions.

SKILLS

- Full-stack web development
- Object-oriented programming
- Consumption and integration of REST APIs
- Relational database management
- Knowledge of React, Node.js, TypeScript, and JavaScript
- Version control with Git
- Basic testing with Jest
- Agile methodologies (SCRUM)
- Problem-solving
- Teamwork and collaboration
- Adaptability and continuous learning

ACHIEVEMENTS

Fourth place nationally in 'WorldSkills', making software projects in a short time improving working speed and ability to solve problems quickly.

Improved front-end code structure through the use of TypeScript and good development practices.

Rapid adaptation to collaborative work environments and agile methodologies such as SCRUM.

Application development with a focus on user experience and comprehensive functionality..
